

Put card payments at the heart of your parking app

Let your clients accept payments directly within your application.

Embed secure payment processing using NMI's simple-to-integrate SDKs and APIs. Available for mobile apps, web-based commerce, and even self-service software.

Key Features

SDKs and APIs for every developer - Android, iOS, Linux, Windows and Cloud POS.

FREE integration support provided by experienced engineers, and no acceptance or signoff is required.

APIs for any point of engagement - parking location apps, parking reservations, valet services, fine payment and enforcement.

Control boarding of your merchants and set pricing within the NMI partner portal.

Customer vault safely stores card details to allow seamless repeat, subscription or recurring payments.

For card-present applications, a range of payment terminals is available, certified with major US processors.

Benefits

- Our payment gateway lets you earn with every transaction you enable. Uncover ongoing revenue opportunities through integrating payments.
- NMI is a payments expert, so you don't have to be. With your parking industry knowledge and our payments expertise, you'll expand your offerings and strengthen your customer relationships.
- With NMI's range of SDKs, terminals and acquirers, backed by straightforward documentation, you can be testing payments integrated into your app or software within hours.
